

Biology – Year 11 transition resources

Instructions

Task 1: Read through each PiXL gateway powerpoint starting with cells, then cell division then maths for biology. Complete the tasks embedded researching the answers using textbooks or online if you are struggling.

<https://www.khanacademy.org/science/biology>

This website is useful for learning and answering the tasks

Task 2: Complete the PiXL gateway biology masterclass booklet, again researching and completing tasks.

Task 3: Extension – Open the OCR Biology Foundations in biology ThinkIT and answer the questions

Task 4: Extension and test yourself – Complete the PiXL independence_KS5_Biology_Biological Molecules Booklet.pdf

The tasks will likely feel difficult especially to start with, I advise working slowly and completing less tasks but in detail than rushing all tasks. Feel free to contact jml@tda.education for more help and guidance with the tasks, even throughout the summer I will respond if I can.

Thank you and I look forward to seeing you in September.

Mr Lomas
